-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election without traverse of group I and species E. in the reply filed on 12/13/04 is acknowledged. Claims 1-3 have been deemed to read on the elected invention and will be examined as follows. Claims 4-10 are withdrawn from consideration as being drawn to non-elected subject matter.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Rausch (US 6594430).

Rausch shows in fig. 11b a lens system including a solid immersion lens(32c) with a spherical portion and a body portion (either the side portion of the central spherical portion or the

Art Unit: 2872

adjacent portion of item 64 may be considered as the body portion) and a meniscus lens(32a) with meniscus portion and a body portion (the side portions of 32a), with a concave surface of the meniscus lens being positioned about the solid immersion lens in spaced relation thereto and the meniscus body portion being supported in fixed position relative to the body portion of the solid immersion lens. Note the teachings of spherical portions in col. 5 line 27 and the paragraph bridging col. 6-7.

Regarding the limitations of claims 1-3 concerning "molded" materials, it should be noted that the manner in which the elements are made is not given significant patentable weight in a product claim since these features do not further limit the claimed invention structurally.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Baumann and Kinder show various arrangements for lens systems.
